Your lab grown diamond has achieved grades of Excellent in all eight aspects of CUT quality assessment. As a result, this lab grown diamond is recognized for its extraordinary brilliance and beauty.

PHYSICAL EXCELLENCE

The first three of the 8X grading factors analyze the exactness of the physical surface, the facet shapes, as well as the angles. This includes the Polish, External Symmetry and Proportions.

Decades of meticulous mathematical calculations have determined that these are the narrow proportion ranges required to produce superior Ideal round brilliant cut diamonds.

| | |
|---------------------------|----------------------------------------|
| Table % | 54.0% to 58.0% |
| Depth % | 59.8% to 62.2% |
| Crown Angle | 34.0° to 35.0° |
| Pavilion Angle | 40.6° to 41.0° |
| Lower Girdle Facet Length | 75% to 80% |
| Star Length | 45% to 55% |
| Girdle Thickness | Thin to Slightly Thick, Faceted |
| Culet Size | None to Very Small |

LIGHT PERFORMANCE EXCELLENCE

The next three of the 8X grading factors are Brilliance, Fire, and Scintillation, which analyze the light handling ability of your lab grown diamond. The combination of these factors is the essence of what makes any diamond visibly shine, dance and sparkle from across a room. Fire and Scintillation are graded while the diamond is in motion and interacting with light. View the Fire and Scintillation videos of this lab grown diamond at GCALUSA.com or by scanning the QR code on this certificate.

OPTICAL EXCELLENCE

The last two 8X grading factors, Optical Symmetry and Hearts & Arrows, scrutinize the craftsmanship and the precise alignment of the crown and pavilion facets in harmony to achieve aesthetic perfection.
